

Managed IT and Cybersecurity Services

A realistic synthetic RFP for testing requirement extraction, classification, citations, and human review workflows.

Field	Procurement detail
Issuer	Northstar Regional Services Authority (fictional)
Reference	BM-RFP-2030-001
Contract term	Initial 36 months with two optional 12-month extensions
Issue date	4 March 2030
Proposal deadline	17:00 CET on 30 April 2030
Service commencement	1 October 2030
Procurement contact	procurement@example.invalid

TEST DOCUMENT NOTICE

This RFP is entirely synthetic. All organizations, people, systems, volumes, dates, and commercial values are fictional. It is designed to resemble a serious public-sector procurement without containing customer data or creating legal obligations.

SUB-001 **MANDATORY** The bidder must submit a complete proposal no later than 17:00 CET on 30 April 2030.

Expected evidence: Timestamped electronic submission receipt.

SUB-002 **MANDATORY** The proposal shall remain valid for at least 180 calendar days after the submission deadline.

Expected evidence: Signed proposal declaration.

SECTION 1

Procurement process and instructions

The Authority will conduct a transparent two-stage evaluation. Bidders are responsible for monitoring issued clarifications and for submitting all requested schedules.

Procurement timetable

Milestone	Date	Owner
RFP published	4 March 2030	Authority
Deadline for clarification questions	22 March 2030	Bidder
Consolidated answers issued	2 April 2030	Authority
Proposal deadline	30 April 2030	Bidder
Presentations and due diligence	20-31 May 2030	Shortlisted bidders
Intended award notice	21 June 2030	Authority

SUB-003 **MANDATORY** Proposals must be submitted as searchable PDF files through the designated procurement portal.

Expected evidence: A portal submission containing all response volumes.

SUB-004 **MANDATORY** The bidder shall identify one authorized representative for all procurement communications.

Expected evidence: Name, title, email address, and telephone number.

SUB-005 **MANDATORY** All clarification questions must reference the relevant section and requirement code.

Expected evidence: Completed clarification template.

SUB-006 **MANDATORY** The bidder must disclose every actual or potential conflict of interest.

Expected evidence: Signed conflict-of-interest declaration.

SUB-007 **OPTIONAL** The bidder should provide a concise executive summary of no more than four pages.

Expected evidence: Executive summary.

SUB-008 **MANDATORY** Alternative proposals shall be clearly separated from the compliant base proposal.

Expected evidence: Separate alternative-proposal appendix, if applicable.

SECTION 2

Authority background and procurement objectives

Northstar Regional Services Authority is a fictional shared-services body supporting municipal operations, citizen-facing services, and regulated administrative functions across five locations.

Current environment

The indicative estate includes 1,250 users, 1,430 managed endpoints, 85 servers, 42 line-of-business applications, Microsoft 365, Azure workloads, two small data rooms, and a mixture of on-site and remote personnel. The incumbent operating model is fragmented across several support providers.

Objectives

The procurement seeks a secure, measurable, and service-oriented operating model with a single accountable provider, standardized processes, resilient operations, and evidence suitable for internal and external assurance.

OBJ-001 **MANDATORY** The provider must deliver a single integrated service model across all in-scope locations and technology domains.

Expected evidence: Proposed operating model and responsibility matrix.

OBJ-002 **MANDATORY** The provider shall maintain a current service inventory covering users, devices, applications, infrastructure, owners, and support dependencies.

Expected evidence: Sample service inventory and maintenance procedure.

OBJ-003 **MANDATORY** The service must support English and Swedish end users during core support hours.

Expected evidence: Language coverage and staffing plan.

OBJ-004 **OPTIONAL** The provider should identify measurable opportunities to reduce avoidable support demand and technical debt.

Expected evidence: Example continual-improvement backlog.

OBJ-005 **MANDATORY** The provider must supply monthly evidence of service performance, security posture, risks, and improvement actions.

Expected evidence: Example monthly service report.

OBJ-006 **OPTIONAL** The provider may provide benchmarking against comparable public-service environments.

Expected evidence: Anonymized benchmarking example.

SECTION 3

Scope of managed services

The successful provider will assume operational responsibility for the service towers below while collaborating with retained Authority personnel and third-party application vendors.

Required service towers

Tower	Indicative scope
Service desk	Omnichannel intake, triage, resolution, knowledge, and user communication
Workplace	Endpoint management, software delivery, identity support, and device lifecycle
Infrastructure	Server, network, backup, cloud operations, monitoring, and capacity
Security operations	Detection, response, vulnerability coordination, and security reporting
Service management	Incident, request, problem, change, configuration, and supplier coordination

SCP-001 **MANDATORY** The provider must operate a staffed service desk from 07:00 to 18:00 CET on Authority business days.

Expected evidence: Staffing model and shift schedule.

SCP-002 **MANDATORY** Priority 1 incident support shall be available 24 hours per day, 365 days per year.

Expected evidence: On-call model and escalation tree.

SCP-003 **MANDATORY** The provider must manage endpoint configuration, patching, encryption, anti-malware, and approved software deployment.

Expected evidence: Endpoint-management service description.

SCP-004 **MANDATORY** The provider shall monitor networks, servers, cloud workloads, backups, and critical integrations.

Expected evidence: Monitoring architecture and sample alert catalogue.

SCP-005 **MANDATORY** The provider must coordinate third-party vendors until incidents and requests are resolved.

Expected evidence: Supplier coordination process.

SCP-006 **OPTIONAL** The provider should propose an on-site support presence for planned high-demand periods.

Expected evidence: Optional on-site coverage model and price.

SECTION 4

Technical and integration requirements

The proposed service must integrate with the Authority's identity, endpoint, collaboration, cloud, network, and reporting environment without creating avoidable vendor lock-in.

TEC-001 **MANDATORY** The service management platform must provide a documented REST API for tickets, assets, users, changes, and reporting data.

Expected evidence: Current API documentation and authentication methods.

TEC-002 **MANDATORY** The provider shall integrate user authentication with the Authority's Microsoft Entra ID tenant using standards-based single sign-on.

Expected evidence: Integration design and supported protocols.

TEC-003 **MANDATORY** All privileged administration must use named accounts, multi-factor authentication, and just-in-time access where technically supported.

Expected evidence: Privileged-access design and screenshots from a reference environment.

TEC-004 **MANDATORY** The provider must support automated export of complete ticket and configuration data in an open, machine-readable format.

Expected evidence: Sample export and data dictionary.

TEC-005 **MANDATORY** Monitoring integrations shall support secure webhook or API delivery into the Authority's reporting environment.

Expected evidence: Integration catalogue and example event payload.

TEC-006 **MANDATORY** The provider must maintain separate development, test, and production configurations for customer-specific automation.

Expected evidence: Environment-separation design.

TEC-007 **OPTIONAL** The provider should offer self-service request automation with approval steps and an accessible user experience.

Expected evidence: Demonstration script or screenshots.

TEC-008 **OPTIONAL** The platform may provide European-hosted generative assistance for ticket summarization when explicitly enabled by the Authority.

Expected evidence: Architecture, data-flow diagram, and opt-out controls.

SECTION 5

Information security and cyber operations

Security controls are material contract requirements. The provider will operate under the Authority's security policies, risk process, and incident-command structure.

SEC-001 **MANDATORY** The bidder must maintain a valid ISO 27001 certification covering the proposed service delivery organization.

Expected evidence: Current certificate, scope statement, and certifying body.

SEC-002 **MANDATORY** All Authority data must be encrypted in transit using TLS 1.2 or later and at rest using industry-standard encryption.

Expected evidence: Cryptographic standards and key-management description.

SEC-003 **MANDATORY** The provider shall notify the Authority of a suspected security incident within 30 minutes of confirmation.

Expected evidence: Incident notification procedure and escalation contacts.

SEC-004 **MANDATORY** Critical security vulnerabilities must be remediated or formally risk-accepted within 72 hours of validation.

Expected evidence: Vulnerability-management policy and exception workflow.

SEC-005 **MANDATORY** The provider must retain security-relevant audit logs for at least 365 days and protect them from unauthorized alteration.

Expected evidence: Logging architecture and retention configuration.

SEC-006 **MANDATORY** Personnel with privileged access shall undergo identity, employment, and criminal-record screening where permitted by law.

Expected evidence: Screening policy and confirmation of coverage.

SEC-007 **MANDATORY** The provider must complete annual penetration testing of internet-facing customer service components.

Expected evidence: Most recent executive penetration-test report and remediation statement.

SEC-008 **OPTIONAL** The provider should hold a current SOC 2 Type II report or equivalent independent assurance.

Expected evidence: Current independent assurance report.

SECTION 6

Privacy, data handling, and records

The provider will act as a processor for selected personal data and must support the Authority's obligations under applicable European privacy and public-records requirements.

DAT-001 **MANDATORY** Authority data must be stored and processed within the European Economic Area unless the Authority gives prior written approval.

Expected evidence: Hosting locations, subprocessors, and data-flow diagram.

DAT-002 **MANDATORY** The bidder shall disclose every proposed subprocessor and the country in which each subprocessor operates.

Expected evidence: Completed subprocessor schedule.

DAT-003 **MANDATORY** The provider must assist with data-subject requests and provide responsive records within five Authority business days.

Expected evidence: Documented request-handling procedure.

DAT-004 **MANDATORY** Personal data shall be retained only for the approved purpose and retention period.

Expected evidence: Retention schedule and deletion-control description.

DAT-005 **MANDATORY** At contract exit, the provider must return Authority data in an open format and securely delete remaining copies within 60 days.

Expected evidence: Exit data plan and deletion certificate template.

DAT-006 **MANDATORY** The provider must support legal hold instructions that suspend normal deletion for identified records.

Expected evidence: Legal-hold procedure and audit evidence.

DAT-007 **OPTIONAL** The provider should provide data-residency reporting through a customer-accessible portal.

Expected evidence: Example residency dashboard.

DAT-008 **MANDATORY** Production Authority data shall not be used to train shared machine-learning or generative models.

Expected evidence: Contractual confirmation and technical control description.

SECTION 7

Service levels, reporting, and governance

Service levels will be measured monthly. Repeated failure will trigger improvement plans and may result in service credits under the final agreement.

Minimum service levels

Measure	Minimum target	Measurement basis
Priority 1 acknowledgement	15 minutes	24x7 clock
Priority 1 restoration	4 hours	24x7 clock
Priority 2 restoration	8 business hours	Core support hours
Service desk answer rate	90% within 60 seconds	Monthly inbound calls
Managed platform availability	99.9% monthly	Excluding approved maintenance
Critical patch compliance	98% within policy	In-scope managed assets

SLA-001 **MANDATORY** The provider shall meet or exceed every minimum service level in the table above.

Expected evidence: Completed SLA compliance statement.

SLA-002 **MANDATORY** Priority 1 incidents must receive executive updates at least every 30 minutes until service is restored.

Expected evidence: Major-incident communication template.

SLA-003 **MANDATORY** A root-cause report shall be delivered within five business days after every Priority 1 incident.

Expected evidence: Example root-cause report.

SLA-004 **MANDATORY** The provider must conduct monthly operational reviews and quarterly executive governance meetings.

Expected evidence: Governance calendar and sample agenda.

SLA-005 **OPTIONAL** The provider should expose near-real-time service dashboards to authorized Authority users.

Expected evidence: Dashboard screenshots and access-control model.

SECTION 8

Transition, implementation, and exit

The Authority expects a controlled transition that protects service continuity, validates knowledge transfer, and establishes measurable readiness before operational responsibility transfers.

TRN-001 **MANDATORY** The bidder must provide a detailed transition plan that achieves service commencement by 1 October 2030.

Expected evidence: Integrated plan with milestones, dependencies, owners, and acceptance criteria.

TRN-002 **MANDATORY** The transition shall include discovery, due diligence, service design, tooling configuration, knowledge transfer, testing, and operational-readiness review.

Expected evidence: Transition work-breakdown structure.

TRN-003 **MANDATORY** The provider must maintain a transition risk and dependency register from contract signature through stabilization.

Expected evidence: Sample RAID register.

TRN-004 **MANDATORY** No production administrative access shall be granted before required screening, training, and access approvals are complete.

Expected evidence: Access-readiness checklist.

TRN-005 **MANDATORY** The provider must perform at least one tested major-incident simulation before service commencement.

Expected evidence: Exercise plan and completion report.

TRN-006 **MANDATORY** The transition must include a rollback plan for each material production change.

Expected evidence: Example rollback plan and approval workflow.

TRN-007 **OPTIONAL** The bidder should propose an accelerated transition option with clearly stated risks and assumptions.

Expected evidence: Optional accelerated plan and price.

EXT-001 **MANDATORY** The provider shall maintain an exit plan and update it at least annually throughout the contract.

Expected evidence: Sample exit plan and annual review process.

SECTION 9

Supplier qualifications and delivery team

Bidders must demonstrate relevant organizational capability, financial resilience, appropriately qualified personnel, and successful delivery in comparable environments.

SUP-001 **MANDATORY** The bidder must provide three customer references for managed IT contracts delivered during the last five years.

Expected evidence: Reference organization, contact, scope, contract period, and value band.

SUP-002 **MANDATORY** At least one reference shall involve a public-sector or similarly regulated organization with more than 750 users.

Expected evidence: Clearly identified qualifying reference.

SUP-003 **MANDATORY** The bidder must have operated continuously for at least three completed financial years.

Expected evidence: Registration extract and three years of financial statements.

SUP-004 **MANDATORY** The bidder shall maintain professional indemnity and cyber liability insurance of at least EUR 5 million per claim.

Expected evidence: Current certificates of insurance.

SUP-005 **MANDATORY** The proposed service delivery manager must have at least five years of relevant managed-service experience.

Expected evidence: Named curriculum vitae and availability confirmation.

SUP-006 **MANDATORY** The bidder must identify key personnel, employment status, location, role, allocation, and proposed substitutes.

Expected evidence: Team schedule and organization chart.

SUP-007 **OPTIONAL** The delivery team should include personnel holding current ITIL, Microsoft, networking, and security certifications.

Expected evidence: Certification matrix.

SUP-008 **MANDATORY** The bidder must disclose any material litigation, regulatory action, or security breach from the previous five years.

Expected evidence: Signed disclosure or explicit nil return.

SECTION 10

Pricing schedule and commercial requirements

Prices must be transparent, comparable, and complete. All figures are to be stated in euros excluding VAT and must include every cost needed to deliver the compliant base service.

Required pricing structure

Price component	Bidder response	Pricing basis
Transition and onboarding	EUR	One-time fixed fee
Core managed service	EUR per month	Fixed monthly fee
Variable end-user service	EUR per user/month	Actual active users
Project services	Rate card	Role and day rate
Optional on-site support	EUR per day	Per requested day
Exit assistance	EUR	Maximum capped amount

COM-001 **MANDATORY** The bidder must complete every line of the pricing schedule and clearly mark items that are included at no additional charge.

Expected evidence: Completed pricing workbook and signed PDF schedule.

COM-002 **MANDATORY** Prices shall remain fixed for the first 24 months of the contract.

Expected evidence: Commercial confirmation.

COM-003 **MANDATORY** Any annual price adjustment after month 24 must be capped at the lower of 3 percent or the applicable harmonized inflation index.

Expected evidence: Proposed indexation clause.

COM-004 **MANDATORY** The bidder must identify all assumptions, exclusions, minimum commitments, and third-party pass-through charges.

Expected evidence: Commercial assumptions schedule.

COM-005 **MANDATORY** The Authority shall own all customer-specific data, configuration documentation, and paid deliverables created under the contract.

Expected evidence: Contractual compliance statement.

COM-006 **OPTIONAL** The bidder may provide separately priced innovation proposals that do not alter the compliant base price.

Expected evidence: Optional innovation schedule.

SECTION 11

Proposal structure, evaluation, and declarations

The Authority will first assess mandatory compliance and then score eligible proposals using the weighted criteria below. Unsupported assertions may receive no credit.

Weighted evaluation model

Criterion	Weight	Primary evidence
Service and technical solution	30%	Response narrative, architecture, demonstration
Security, privacy, and resilience	25%	Control evidence, certifications, assurance reports
Transition and delivery capability	15%	Plan, team, references, risk approach
Commercial value	25%	Evaluated total cost and commercial terms
Social and environmental value	5%	Measurable commitments and reporting

RSP-001 **MANDATORY** The proposal must include a requirement matrix that responds to every requirement code with Comply, Partially Comply, or Do Not Comply.

Expected evidence: Completed requirement matrix with response cross-references.

RSP-002 **MANDATORY** Every claim used to support a scored response shall reference evidence included in the proposal.

Expected evidence: Evidence index.

RSP-003 **MANDATORY** A proposal will be rejected if any mandatory requirement is marked Do Not Comply without an expressly accepted clarification.

Expected evidence: Signed compliance declaration.

RSP-004 **MANDATORY** The bidder must describe all material dependencies on the Authority, incumbent providers, and third parties.

Expected evidence: Dependency schedule.

RSP-005 **MANDATORY** The bidder shall confirm acceptance of the draft terms or provide a complete exceptions schedule.

Expected evidence: Signed acceptance or exceptions schedule.

RSP-006 **MANDATORY** The final proposal must be signed by a person authorized to bind the bidding organization.

Expected evidence: Authorized signature and signatory title.

RSP-007 **OPTIONAL** Bidders should propose measurable carbon-reduction and digital-inclusion commitments relevant to service delivery.

Expected evidence: Commitment plan with baselines and annual measures.

END OF REQUEST FOR PROPOSAL

Appendices expected with the bidder response: requirement matrix, pricing schedule, security questionnaire, subprocessor schedule, transition plan, references, insurance certificates, and declarations.
